Senior Researcher ♦ Comparative Behavioral Ecology Group ♦ Email ♦ Website
Department of Human Behavior, Ecology and Culture ♦ Max Planck Institute for Evolutionary Anthropology

I strive for a diverse, transparent, and equitable academia by taking anti-racist and anti-sexist actions (since 2016) and only publishing articles in journals that are 100% open access, at ethical publishers, and who charge low or no article processing fees. This is important because most traditional journals publish research by primarily white men based in the Global North, thus entrenching racist and sexist policies in academia (e.g., Maas et al. 2021, Chander et al. 2022).

EDUCATION

- 2008-2012 **PhD** Experimental Psychology, University of Cambridge (with Prof Nicola Clayton) and Murray Edwards College
- Investigated the sociality, ontogeny, and function of corvid (birds in the crow family) postconflict affiliation, finding that even the least social species studied so far uses social support
 - Developed new methods to detect postconflict affiliation in strongly bonded individuals
- 2002-2004 **BS** Biology, The Evergreen State College, WA, USA (with Prof John Longino)
- Discovered that adult male coatis play with juveniles rather than predate them, which makes them an excellent model for studying the mechanisms of infanticide
- 1999-2002 **AA** Degree in Biology and Drama, Skagit Valley College, WA, USA

TEACHING EXPERIENCE

- 2019 **Taught** [How to improve the value of your research](#), Module 1: Open Principles, Open Science MOOC
- 2019 **Designed and taught a workshop:** *How to implement an open and transparent workflow* for researchers at the Max Planck Institute for Evolutionary Anthropology
- 2018 **Ran a roundtable:** *Bursting the Academic Bubble* where PhD students learned about a variety of career options, Max Planck Institute for Evolutionary Anthropology
- 2016 fall **Co-instructor**
Course: *Neuroethology: The neural basis of adaptive behaviour*
Department of Zoology, University of Cambridge
- Co-designed this new course for 20 final year undergraduates with another instructor
 - Delivered lectures on Introduction to brains, What does brain size mean, and Mental time travel
 - Tutored small groups on the course material (20 students)
 - Graded 16 tests (essays)
- 2016 **Taught lecture and lab practical** *Behavioral flexibility and brain size in birds and mammals* for Technologies and Techniques Seminar Series, Anglia Ruskin Univ., UK
- 2014 fall **Co-instructor**
Course: *Behavioral science: are you doing it wrong?* (Psych 594G)

Corina J Logan

Senior Researcher ♦ Comparative Behavioral Ecology Group ♦ Email ♦ Website
Department of Human Behavior, Ecology and Culture ♦ Max Planck Institute for Evolutionary Anthropology

Dept. of Psychological and Brain Sciences, University of California Santa Barbara

- Co-designed this graduate seminar series with three other research fellows
- Led seminars on biomimicry, mental time travel, social support, group leadership, and an integration across the series

- 2014 **Taught** *Conflict Management in Avian Close Relationships* for Social Psychology of Close Relationships (Psych 149, 1 lecture), UCSB
- 2014 **Taught** *How New Caledonian crows learn about and solve foraging problems* for a seminar series at Santa Barbara City College (1 lecture)
- 2013 & 2014 **Taught** *Animal Cognition* for Ethology and Behavioral Ecology (EEMB 138, 3 lectures), UCSB
- 2013 & 2014 **Taught lab practical** on *Avian interspecies dominance hierarchies* for Methods in Field Biology (Biol 130), Santa Barbara City College
- 2013 fall **Co-instructor**
Course: *Interdisciplinary Approaches to Brains and Behavior* (Psych 594G)
Dept. of Psychological and Brain Sciences, University of California Santa Barbara
- Co-designed this graduate seminar series with three other research fellows
 - Led seminars on lab versus field studies and model organisms
- 2011-2018 **Graded** critical reviews, literature reviews, and research project reports for ~25 final year undergraduates, Department of Zoology, University of Cambridge
- 2009-2011 **Assisted in conducting lab practicals** on bird song, learning, and memory for ~500 first year undergraduates in *Evolution and Behaviour* and graded ~15% of their exams (3 quarters), Dept of Experimental Psychology, University of Cambridge
- 2009, -11, -16 **Tutored** small groups of final year undergraduates in *Behaviour*, Department of Zoology, University of Cambridge (~40 students)
- 2009, -11, -16 **Developed and delivered a scientific writing workshop** for ~75 final year undergraduates, Department of Zoology, University of Cambridge

MENTORING EXPERIENCE

Supervised 54 research assistants: 46 undergraduate, 1 PhD, 4 high school, 1 community volunteer, 6 employees in the US, UK, and Germany. 80% women, and 36% from other groups who are traditionally underrepresented in academia

High school students

- 2014 Jody Vis, *in Santa Barbara, CA, from the Netherlands*
- 2014 Nike Cosmides, *Santa Barbara, CA*
- 2010 Sophie, *Cambridge, UK*
- 2009 Ada Humphrey, *Cambridge, UK*

Senior Researcher ♦ Comparative Behavioral Ecology Group ♦ Email ♦ Website
Department of Human Behavior, Ecology and Culture ♦ Max Planck Institute for Evolutionary Anthropology

Undergraduate students

2021-2022	Lea Gihlein, <i>Institute of Biology, University of Leipzig</i>
2020-2021	Tiana Lam, <i>School of Life Sciences, Arizona State University</i>
2020	Justin Hunyh, <i>School of Life Sciences, Arizona State University</i>
2020	Sam Muñoz, <i>School of Life Sciences, Arizona State University</i>
2019-2020	Sierra Planck, <i>School of Life Sciences, Arizona State University</i>
2019-2020	Jennifer Berens, <i>School of Life Sciences, Arizona State University</i>
2019-2020	Emily Blackwell, <i>School of Life Sciences, Arizona State University</i>
2019-2020	Kaylee Delcid, <i>School of Life Sciences, Arizona State University</i>
2019-2020	Brynna Hood, <i>School of Life Sciences, Arizona State University</i>
2019-2020	Sam Bowser, <i>School of Life Sciences, Arizona State University</i>
2019-2020	Michael Pickett, <i>School of Life Sciences, Arizona State University</i>
2019	Amanda Overholt, <i>School of Life Sciences, Arizona State University</i>
2019	Mina Mohammed, <i>School of Life Sciences, Arizona State University</i>
2019	Elise Lange, <i>School of Life Sciences, Arizona State University</i>
2019	Dylan Archibeque, <i>School of Life Sciences, Arizona State University</i>
2018-2019	Aldora Messinger, <i>School of Life Sciences, Arizona State University</i>
2018-2019	Elysia Mamola, <i>School of Life Sciences, Arizona State University</i>
2018-2019	Rita Barakat, <i>School of Life Sciences, Arizona State University</i>
2018-2019	Michael Guillen, <i>School of Life Sciences, Arizona State University</i>
2018-2019	Olateju Ojekunle, <i>School of Life Sciences, Arizona State University</i>
2018-2020	August Sevchik, <i>School of Life Sciences, Arizona State University</i>
2018-2019	Adriana Boderash, <i>School of Life Sciences, Arizona State University</i>
2018	Nancy Rodriguez, <i>School of Life Sciences, Arizona State University</i>
2018	Sofija Savic, <i>School of Life Sciences, Arizona State University</i>
2018	Brianna Thomas, <i>School of Life Sciences, Arizona State University</i>
2018	Steven Liu, <i>W. P. Carey School of Business, Arizona State University</i>
2017-2018	Aelin Mayer, <i>Maricopa Community College</i>
2016	Katherine Lister, <i>Dept. of Zoology, University of Cambridge</i>
2015	Soumya Suresh, <i>Dept. of Ecology, Evolution and Marine Biology, UCSB</i>
2015	Linnea Palmstrom, <i>College of Creative Studies, University of CA Santa Barbara (UCSB)</i>
2015	Michelle Gertsvolf, <i>Dept. of Ecology, Evolution and Marine Biology, UCSB</i>
2014-2015	Luisa Bergeron, <i>Dept. of Ecology, Evolution and Marine Biology, UCSB</i>
2014-2015	Brigit Harvey, <i>Dept. of Integrative Biology and Physiology, UCLA</i>
2014-2015	Laila Kamali, <i>Santa Barbara City College</i>
2014	Mackenzie Zisser, <i>Dept. of Psychology, University of California Berkeley</i>
2013-2015	Christin Palmstrom, <i>College of Creative Studies, University of CA Santa Barbara (UCSB)</i>
2013-2014	Deanna Falge, <i>Dept. of Psychological and Brain Sciences, UCSB</i>
2013	Alexis Breen, <i>Dept. of Ecology, Evolution and Marine Biology, UCSB</i>
2013	Thomas Alterman, <i>Dept. of Psychological and Brain Sciences, UCSB</i>
2010-2011	Paul Saunders, <i>Dept. of Zoology, University of Cambridge</i>
2010-2011	Helen Atkinson, <i>Dept. of Zoology, University of Cambridge</i>
2010-2011	Heather Reynolds, <i>Dept. of Zoology, University of Cambridge</i>
2010-2011	Rebecca Pearce, <i>Dept. of Experimental Psychology, University of Cambridge</i>
2010	Caroline Graham, <i>Dept. of Experimental Psychology, University of Cambridge</i>
2010	Lisa Grassato, <i>University of Cambridge Veterinary School</i>
2010	Daniel Ward, <i>Dept. of Zoology, University of Cambridge</i>

Department of Human Behavior, Ecology and Culture ♦ Max Planck Institute for Evolutionary Anthropology

Supervised undergraduate senior theses

- 2021-2022 **Lea Gihlein**, University of Leipzig, *Are there differences in behavioral traits between populations across the great-tailed grackle's geographic range?*
- 2019-2020 **August Sevchik**, Arizona State University, *Investigating sex differences in genetic relatedness in great-tailed grackles in Tempe, Arizona to infer potential sex biases in dispersal*. Published in 2022 <https://doi.org/10.26451/abc.09.01.04.2022>
- 2014-2015 **Christin Palmstrom**, University of California Santa Barbara, *Social learning in the great-tailed grackle*

Graduate student committees

- 2018 PhD: Riana Minocher, Dept. of Human Behavior, Ecology and Culture, MPI EVA
Reproducibility in behavioral ecology
- 2016-2018 PhD: Piero Amodio, Dept. of Experimental Psychology, University of Cambridge
Social learning in corvids and octopus
- 2014-2018 PhD: Victoria Franks, Dept. of Zoology, University of Cambridge
Social learning in hihis
- 2013-2018 PhD: Kelsey McCune, Dept. of Psychology, University of Washington
Social learning in jays
- 2014-2017 PhD: Jenny Easley, Dept. of Zoology, University of Cambridge
Taste aversion in chickens and great tits
- 2014-2015 MS: Nicole Gomez, Biological Sciences Dept., California State University
Grackle neuroanatomy comparison

External PhD thesis examiner

- 2023 Paula Ibáñez de Aldecoa, Dept. of Biology, University of Vienna
Mechanisms, components and promoters of innovation in birds and humans
- 2018 Kelsey McCune, Dept. of Psychology, University of Washington
Cognition gone wild: a test of the social intelligence hypothesis in wild birds

Postdocs

- 2020-2021 Alexis Breen, Dept. of Human Behavior, Ecology and Culture, MPI EVA
- 2019-2020 Maggie MacPherson, Institute for Social Behavioral and Economic Research, UCSB
- 2018-2026 Kelsey McCune, Inst. Social Behavioral & Economic Research, UCSB; Auburn Univ
- 2018 Zoe Johnson-Ulrich, Institute for Social Behavioral and Economic Research, UCSB

Research assistants

- 2021 Josie Hubbard, College of Biological Sciences, University of California Davis
- 2020-2022 Vincent Kiepsch, Dept. of Human Behavior, Ecology and Culture, MPI EVA
- 2020 Sawyer Lung, Dept. of Human Behavior, Ecology and Culture, MPI EVA
- 2019-2020 Melissa Folsom, Dept. of Human Behavior, Ecology and Culture, MPI EVA
- 2019-2020 Anja Becker, Dept. of Human Behavior, Ecology and Culture, MPI EVA
- 2019 Sophie Kaube, Dept. of Human Behavior, Ecology and Culture, MPI EVA
- 2017-2019 Carolyn Rowney, Dept. of Human Behavior, Ecology and Culture, MPI EVA
- 2015 Maya Shoemaker, Santa Barbara resident

RESEARCH EXPERIENCE

- 2018-current **Senior Researcher and Leader of the Comparative Behavioral Ecology**

Corina J Logan

Senior Researcher ♦ Comparative Behavioral Ecology Group ♦ Email ♦ Website
Department of Human Behavior, Ecology and Culture ♦ Max Planck Institute for Evolutionary Anthropology

group, Department of Human Behavior, Ecology and Culture, Max Planck Institute for Evolutionary Anthropology

- **Designed and implemented anti-racist/anti-sexist recruitment policies (e.g., candidates only interviewed if they are a good role model for groups that are traditionally underrepresented in STEM, recruit primarily through underrepresented minority platforms, use quotas for racial composition of research assistants)**
- Great-tailed grackles, a flexible bird species, have rapidly expanded their range into human modified environments across North America over the past 140 years. I showed that grackles in a recently established population on the edge of their range are more persistent and have a higher variance (but similar average) in flexibility compared with grackles in an older population away from the northern edge. I revealed that behavior is likely involved in facilitating this rapid range expansion
- Revealed that the closely related, but not rapidly expanding boat-tailed grackles are as flexible as the rapidly expanding great-tailed grackles, further refuting the hypothesis that flexibility plays the primary role in a geographic range expansion
- Discovered grackle behavioral flexibility is manipulable and improves problem solving, foraging behavior, and flexibility in a new context
- Founded ManyIndividuals, a reproducible research program of a global network of researchers with field sites. We are investigating whether training successful and threatened species to be more flexible improves their success in human modified environments
- Field work is challenging and the minimum sample sizes indicated by traditional power analyses are not feasible to achieve. I am therefore “Rethinking Animal Behavior” by innovating bespoke, hypothesis- and population-specific models that guide data collection and provide a template for others to follow. This allows researchers to get the most out of limited samples using non-invasive approaches
- I aim for the tenant of the Max Planck Society that excellent research needs open science. I co-founded Peer Community in Registered Reports, dedicated to reviewing and recommending Registered Reports across the full spectrum of STEM, medicine, the social sciences, and humanities. It has become internationally renowned for being a unique platform that gives authors and editors power in the process of sharing research outputs

2015-current **Research Associate**, Dept. Psychological and Brain Sciences, then Neuroscience Research Institute, University of California Santa Barbara

- Brought two awards to UCSB to fund postdocs and technicians on the grackle project
- The grackle permits and ethics (IACUC protocol) are based at UCSB, which is where the project started
- UCSB provides veterinary support for the grackles either directly (when the field site is in Santa Barbara) or through cooperation agreements with other universities (when the field site is located elsewhere)

2015-2018 **Leverhulme Early Career Research Fellow**, Department of Zoology, University of Cambridge and Bye Fellow, Murray Edwards College (2016-2018)

Corina J Logan

Senior Researcher ♦ Comparative Behavioral Ecology Group ♦ Email ♦ Website
Department of Human Behavior, Ecology and Culture ♦ Max Planck Institute for Evolutionary Anthropology

- **Designed and implemented anti-racist/anti-sexist policies for supporting students (e.g., evaluate individuals rather than looking for a “good” CV which is more a sign of privilege than quality, female-code language in adverts, male-code language in letters of reference)**
- Conducted the first study on the heritability of endocranial volume (a brain size proxy) in a wild mammal
- Discovered that endocranial volume is heritable and associated with female lifetime reproductive success and longevity, but not fecundity, in 1314 red deer
- Results confirm some long-standing, previously untested assumptions about brain size variation and show that some cross-species hypotheses hold within-species

- 2012-2015 **Junior Research Fellow**, SAGE Center for the Study of the Mind, University of California Santa Barbara
- Discovered that New Caledonian crows do not learn by imitating; therefore, I suggested a new pathway for the evolution of cumulative technological culture
 - Conducted the first cognitive tests on great-tailed grackles, finding that, contrary to predictions, their behavioral flexibility is similar to that of crows despite their smaller relative brain size and lack of anecdotal foraging innovations
 - Showed that behavioral flexibility is independent from problem solving, innovativeness, and other behaviors such as neophobia
- 2004-2008 **Research Assistant** at the University of Washington, Stanford University, University of Arizona, and Washington State Department of Natural Resources

SELECTED GRANTS (see www.CorinaLogan.com for full list)

2022-2026	Max Planck Digital Library	€14,000
	<i>Funding for Peer Community in Registered Reports</i>	
2017	Shuttleworth Foundation Flash Grant	\$5,000
	<i>Funded the #BulliedIntoBadScience campaign</i>	
2015	Cambridge Graduate School of Life Sciences Researcher Development Grants	£718

Corina J Logan

Senior Researcher ♦ Comparative Behavioral Ecology Group ♦ Email ♦ Website
Department of Human Behavior, Ecology and Culture ♦ Max Planck Institute for Evolutionary Anthropology

	<i>Funded an 'Exercise your interview skills' workshop for PhD students and postdocs</i>	
2015-2018	Leverhulme Early Career Fellowship/Newton Trust salary + research funds	£123,000
2014	University of California Santa Barbara Open Access Pilot Fund Program	£857
	<i>Covered publication fees for Logan et al. (2014) in PLOS ONE</i>	
2012-2014	National Geographic Society/Waitt Grants Program	£9,000
	<i>Funded field research on New Caledonian crows and great-tailed grackles</i>	
2012-2015	Junior Research Fellowship, SAGE Center salary + research funds	£91,115
2010-2011	Cambridge Philosophical Society Travel Grants (conferences)	£685
2009-2011	Gates Cambridge Trust Research Grants (conferences)	£2,111
2009-2011	Murray Edwards College Research and Travel Grants (conferences)	£895
2008-2011	Murray Edwards College International Bursary	£3,000
2008-2011	Gates Cambridge Scholarship (awarded to top 5% of 800 applicants)	£75,000
	<i>Funded my PhD fees, living costs, and stipend at the University of Cambridge</i>	

SELECTED AWARDS (see www.CorinaLogan.com for full list)

2016-2018	Post-doctoral Bye Fellow, Murray Edwards College, University of Cambridge	
2016	<i>Learning & Behavior</i> Best Article Award	£761
2011	Best Talk (out of 12), Murray Edwards College Graduate Symposium	£50
2009	Science Writing Prize, Assoc. for the Study of Anim Behav & <i>New Scientist</i>	£1,000
2009	2 nd prize Best Student Talk (out of 50), International Ethological Congress	£40
2003-2004	K.E.Y. Student Services Award, The Evergreen State College	\$3,750
2002-2003	Academic Achievement Award, The Evergreen State College	\$900
2002	Skagit Valley College: graduated with high honors and the President's Medal (top 1.8%), grades (GPA): 3.91/4.00	

SELECTED INVITED TALKS (see www.CorinaLogan.com for full list)

2025	<i>Are great-tailed grackles more flexible than boat-tailed grackles?</i> 9th Annual Archbold Research Symposium, online
2024	<i>Growing up in academia</i> , Max Planck Institute for Empirical Aesthetics, Frankfurt, Germany
2023	How Peer Community in Registered Reports lets researchers take back control of the publishing process. Symposium: Progress & future directions in open science, Brighton, UK
2022	International remote seminar on Frontiers in Social Evolution
2021	<i>Animal Ecology</i> , University of Potsdam, Germany
2020	<i>Coffee with Scientists</i> , University of Cambridge
2019	<i>Zoology</i> , Charles University, Prague; <i>Workshop: Future of registered reports</i> , Center for Open Science, London; <i>Keynote: Open Science Day</i> , Max Planck Institute for Human Cognition, Leipzig; <i>eScience Institute</i> , University of Washington; <i>Open Access Ambassadors</i> , Max Planck Society, Berlin
2018	<i>Biology</i> , New Mexico State University; <i>Biology</i> , University of New Mexico; Symposium speaker: <i>The State of Peer Review</i> , Joint Statistical Meetings, Vancouver, BC; <i>Keynote: Munin Conference</i> , Tromso, Norway; <i>Todos seminar speaker</i> , The Arctic University of Norway, Tromso, Norway
2017	<i>Evolution of Social Complexity</i> , Arizona State University; <i>eLife</i> ; <i>Archbold Research Station</i> , FL; <i>Zoology</i> , Office of Scholarly Communication, Graduate Union, University of Cambridge; <i>Max Planck Institute for Evolutionary Anthropology</i> ; <i>OpenCon</i> ; <i>Biology</i> , University of York
2016	<i>Animal & Environmental Biology</i> , Anglia Ruskin University, UK; <i>Centre National de la Recherche Scientifique</i> , France; <i>Zoology</i> , Wolfson College, <i>Zoology Postdocs</i> , <i>Open Policy</i> , University of

Corina J Logan

Senior Researcher ♦ Comparative Behavioral Ecology Group ♦ Email ♦ Website
Department of Human Behavior, Ecology and Culture ♦ Max Planck Institute for Evolutionary Anthropology

- Cambridge; *Zoology*, Stockholm University; *Leverhulme Trust Board meeting*, London
2015 *Biology*, University of St Andrews; *Center for Behavior, Evolution, and Culture*, UCLA; *Zoology, History and Philosophy of Science*, University of Cambridge
2014 *Biology*, Washington University; *Psychology*, University of Washington; *Santa Barbara City College; Hastings Natural History Reserve; Psychology*, University of California Santa Barbara (UCSB); *Laboratory of Neuroendocrinology*, UCLA; *Ecology, Evolution and Marine Biology*, UCSB
2013 *Psychology*, University of Washington; *National Center for Ecological Analysis and Synthesis*, UCSB
2012 *Psychology*, UCSB; *University of Edinburgh*
2011 *Sub-dept of Animal Behaviour*, University of Cambridge; *Biology*, University of Washington; *Behavioural Ecology*, University of Neuchâtel, Switzerland

CONFERENCE PRESENTATIONS

- 2023 The ManyIndividuals reproducible research program, *2023 Big Team Science Conference*, online
2022 Plenary: How Peer Community in Registered Reports lets researchers take back control over the publishing process, *Society for Open, Reliable, and Transparent Ecology and Evolutionary biology (SORTEE)*, online
2018 Is behavioural flexibility evidence of cognitive complexity? *LeadNet*, Berlin [poster]
2017 Is behavioural flexibility evidence of cognitive complexity? *International Conference on Comparative Cognition*, Melbourne Beach, Florida
2016 Endocranial volume is heritable and associated with fitness in deer. *International Society for Behavioral Ecology*, Exeter [poster]
2016 Behavioral flexibility in an invasive bird is independent of other behaviors. *European Conference on Behavioural Biology*, Vienna, Austria
Are invasive species behaviorally flexible? *Ethology*, Göttingen, Germany.
2015 Does innovation frequency indicate complex cognition? *Behaviour*, Cairns, Australia.
How New Caledonian crows solve novel foraging problems and what it means for cumulative culture. *ASAB Winter Meeting*, London, UK
2013 Formalizing a broad post-conflict affiliation hypothesis. At a symposium I organized: *Post-conflict affiliation: applications for conflict management in humans. Behaviour*, Newcastle, UK
2011 The sociality and ontogeny of corvid postconflict affiliation. *Behaviour*, Bloomington, US
2010 Does social support reduce stress in corvids? *International Society for Behavioral Ecology*, Perth, Australia
2009 The evolution and ontogeny of postconflict third-party affiliation in corvids. *International Ethological Congress*, Rennes, France

SERVICE AND OUTREACH (see www.CorinaLogan.com for full list)

Editor

- 2021-current Co-founder (co-Editor-in-Chief), Managing Board member, and Recommender (editor), *Peer Community in Registered Reports*
2018-current Managing Board member (2018-2022) and Recommender (editor), *Peer Community in Ecology*
2016-2020 Associate Editor, *Royal Society Open Science*
2017-2020 Editorial Board member, *Animal Behavior and Cognition*

Corina J Logan

Senior Researcher ♦ Comparative Behavioral Ecology Group ♦ Email ♦ Website
Department of Human Behavior, Ecology and Culture ♦ Max Planck Institute for Evolutionary Anthropology

Grant reviewer: European Science Foundation postdoctoral fellowships (2025), La Caixa Postdoctoral Fellowship (17 applications, Spain/Portugal; 2020), Vienna Science and Technology Fund (2018)

Reviewer: Canada Excellence Research Chairs (2023)

Reviewer: *Peer Community in Registered Reports, Peer Community in Ecology, PeerJ, eLife, Open Research Europe, Ethology, Behaviour, Royal Society Open Science, Biology Letters, The Quarterly Review of Biology, Animal Behaviour, PLOS ONE, Behavioural Processes, Frontiers in Psychology, Proceedings of the Royal Society B, Philosophical Transactions of the Royal Society B, Current Zoology, Avian Research, Animal Cognition, Behavioral Ecology and Sociobiology, Behavioral Sciences*. Note: Since 2017, I only review articles at 100% open access journals at ethical publishers where the peer review history is published alongside the article.

Outreach

2017 How to make your voice heard. eLife #ECRWednesday webinar
2016-2022 Aiming High Conference (2016) and mentor for Networking Events at Murray Edwards College, University of Cambridge
2015 Big Game Night, Cambridge Festival of Ideas
2015 Ask Me Anything, PLOS Science Wednesday
2015 *Amazing Animals*, The Naked Scientists podcast and BBC's 5live Science
2014 *How New Caledonian crows learn about and solve foraging problems*, Audubon Society
2014 Talks on bird cognition, Santa Barbara Zoo

Organizer:

2019 *A researcher-run solution to improving science and reducing reviewer burden: peer review of preprints and preregistrations at Peer Community In*, Max Planck Institute for Evolutionary Anthropology (MPI EVA)
2019 Co-organized workshop with the Max Planck Digital Library: *How are Max Planck researchers improving their research and scholarly publishing through open practices?* MPI EVA
2018 Conducted a Workplace Culture survey and workshops in the Department of Zoology at Cambridge to contribute to the Collaborating with Men research project at Murray Edwards College
2017 Organized and led an early career researcher workshop on *Moving brain size forward*
2017-2018 Postdoc Research Convener for Murray Edwards College
2017-2018 Member of Journals Coordination Scheme School of Biological Sciences Consultative Committee and served as the School of Biological Sciences representative on the Journals Coordination Scheme Working Group at Cambridge
2016-current Facilitating a shift to *ethical scientific publishing* through #BulliedIntoBadScience, PCI RR, articles, blog posts, talks, and organizing
2016-2017 Co-organized University of Cambridge Department of Zoology Tea Talk seminar series
2016-2018 OpenConCam member (OpenCon in Cambridge)
2015 Implemented Cambridge-wide interview workshops based on theatre exercises for postgraduate and postdoc researchers
2014 Co-organized a SAGE Junior Research Fellow workshop on *Coordinating the study of social coordination*

Corina J Logan

Senior Researcher ♦ Comparative Behavioral Ecology Group ♦ Email ♦ Website
Department of Human Behavior, Ecology and Culture ♦ Max Planck Institute for Evolutionary Anthropology

2013 Co-organized a SAGE Junior Research Fellow workshop on *The human condition as a network of networks*

2013 Organized a *symposium* at Behaviour 2013

Mentor: Animal Behavior Collective (since 2025), Murray Edwards College at the University of Cambridge (since 2016)

Invited member: Max Planck Society Open Science Commission, Centre of Finnish Registered Reports Advisory Board Member (2023)
